Hello fellow MRFA members:

Another month has past, warmer weather is growing closer. Have you checked your batteries? Did you do your winter maintenance on your aircraft? It is not to late. Take a few moments to look things over, because the weather is going to be GREAT one day soon and you will want to go to the field!

The 50th year for the Toledo show has come and gone too. This year was especially busy for me. I saw several MRFA members there, but had little time to visit. If you went you saw a few new items. One of the show stoppers was the plasma screen TV's with the new "Reflex" flight simulator on it. WOW!! What graphics! If you could add the smell of nitro.... You just might have thought you were there.

This week is the April MRFA meeting and I must apologize for when we decided to move this months meeting up a week we did not realize it was Easter night. So a brief run down on what to expect.

1. What will the field need to prepare for the up coming season. Including the soil sample reports to confirm what the soil needs to grow our grass. Repair of the damage on the port-a-poty, distribution of the top soil we have and outlining the work for the April 24th field clean up day.
2. The Friends of Flight cards are done, if you are interested in being a part of this please try to attend this meeting. Remember, to be a part of this means that you will commit to attending a couple of fun fly's at the other participating clubs events. You must be a ambassador of good will to our fellow R/C er's
3. If you do not have you new key yet, you need to contact Henry Saylor or attend this meeting. (Please remember to return your old key)
4. Fuel order update

Build night has been going well and if you have not attended I hope that you have checked the progress on the web site on the what's new page.

Keep the stick forward
Dave
